---

Dear NASAA:

As a member of the franchise community and supporter of Responsible Franchising principles as defined by the International Franchise Association (IFA), I applaud NASAA's work in furthering greater transparency in the franchise sales process consistent with those Responsible Franchise principles through NASAA's proposed Model Broker Registration Act. Consistent with IFA's position to the Model Broker Registration Act, I believe that NASAA's proposed registration and disclosure requirements for third party franchise sellers signal an important step in protecting the franchise model by providing prospective franchisees with information about the roles of all parties involved the franchise sales process in addition to the information provided in the franchise disclosure document.

Thank you,
